

Inspection Report

City of Bridgeton
181 East Commerce Street
Bridgeton, NJ 08302

Customer ID: **2053**
Certificate: **22-C-0007**
Site: 001
Cohanzick Zoo

Type: ROUTINE INSPECTION
Date: 14-JUL-2026

3.125(a) Repeat

Facilities, general.

The following item is still in need of repair:

* The floor of the African Porcupine's indoor housing has several areas of missing paint throughout. This floor is no longer in good repair. No flakes of peeled paint were observed in the enclosure, but the missing areas of paint now expose the cement floor. Due to the missing paint, the exposed cement floor is no longer in good repair.

The floor should be repaired to maintain it in good repair and to protect the porcupine from injury should paint be ingested.

3.150(a) Repeat

Facilities, general.

The following item is still in need of repair:

The enclosures for the Blue & Gold macaw and Moluccan cockatoo, in the winter housing area, share the same cement floor. The paint has peeled away, thus exposing the cement throughout. No peeled paint flakes were observed. This missing paint now leaves the floor in disrepair. Peeled paint flakes, should they appear, could harm the birds if ingested.

Facility should repair the floor to maintain it in good repair and to protect the birds from injury.

Housing facilities for birds must be designed and constructed so that they are structurally sound for the species of bird housed in them. They must be kept in good repair, protect the birds from injury, and restrict other animals from entering that may negatively affect the welfare of the birds within.

This inspection and exit interview were conducted with the facility representatives.
