Type: FOCUSED INSPECTION
Date: 05-AUG-2026

2.40(b)(3) **Direct** **Repeat**

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The facility has not sought veterinary care for two adult budgies. A female adult budgie was observed in a cage with an adult male. She had a red swollen mass protruding from beneath her tail as observed on the last inspection. A second bird, a male adult budgie, was seen with a circular patch of feather loss on both eyes. Licensee stated that he was unaware of what birds he was cited for on the last inspection indicating a continual lack of daily observations. When asked the licensee stated that he had not communicated with the veterinarian nor has he provided treatment for these birds. Based on the current condition of these birds there are active issues that require veterinary attention.

Failure to identify changes in animal health and behavior and a lack of communication with the attending veterinarian on these issues can result in delayed treatment prolonging animal suffering and discomfort. Daily observation must be performed on all animals to assess their health and well-being and provide treatment as needed. Direct and frequent communication with the attending veterinarian is required so that timely and accurate information on problems of animal health can be conveyed to the attending veterinarian. The licensee must seek out veterinary care with their attending veterinarian.

Correct by close of business day tomorrow, 8/6/2026.

This inspection and exit interview were conducted with the licensee.
