Type: ROUTINE INSPECTION

Date: 24-JUN-2026

3.125(a)

Facilities, general.

The holding enclosures housing four 4 reindeer and 3 Przewalski's horses were not in good repair. There was a sharp edge of metal due to bent metal flashing covering the side of a sliding door connecting two enclosures. There were also sharp edges of metal due to corrosion of the metal panels on the bottom of the front panels of the sliding doors.

Failure to maintain housing facilities in good repair could result in injury. Correct by ensuring outdoor housing facilities are structurally sound and maintained in good repair to protect the animals from injury.

This inspection and exit interview were conducted with facility representatives.
