Type: ROUTINE INSPECTION

Date: 05-AUG-2026

3.125(a) Critical

Facilities, general.

On May 28, 2026, a male Speke's gazelle sustained severe injuries after entering an adjacent off exhibit enclosure containing two zebras through a broken fence. The gazelle had been placed in an off exhibit enclosure adjacent to the zebras due to sparring behavior observed that morning. Two fence slats between the enclosures had been broken in September 2025, removed, and never repaired. Although hay bales had been placed over the opening, the gazelle was still able to access the zebra enclosure due to the missing fence slats. The area supervisor did not submit or follow up on a work order to correct the broken enclosure fence. The gazelle received medical treatment but continued to decline and was humanely euthanized. Failure to maintain housing facilities in good repair can lead to escape and injury of the animals housed within. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be maintained in good repair to protect the animals from injury and to contain the animals. The removed fence slats were fixed by the facility the morning of the incident prior to this inspection.

This inspection and exit interview were conducted with the facility representative and attending veterinarian.
