Customer ID: **9191**

Certificate: **93-R-0432**

Site: 001

UNIVERSITY OF CALIFORNIA,
BERKELEY

Type: ROUTINE INSPECTION

Date: 11-AUG-2026

2.38(f)(1) Critical

Miscellaneous.

According to a letter of notification written to OLAW, in November 2025 a Primary Investigator notified the Office of Lab Animal Care (OLAC) that their lab members had "found two voles dead in a cage with water but no food. Lab members also discovered a second vole cage, with one male and one female, containing food but no water. The male was unable to "right" itself and was culled". A necropsy performed by the Office of Lab Animal Care's consulting veterinary pathologist noted that, "Pathology findings suggested that the deaths were caused by a lack of food and/or water". Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort.
Corrected prior to inspection

This inspection and exit interview were conducted with facility representatives.
