Certificate: **35-A-0546**

Site: 001

Ben and Malinda Beiler

Type: ROUTINE INSPECTION

Date: 04-AUG-2026

3.1(e)

Housing facilities, general.

A bulk food storage bag in the storage room was open and at risk of contamination by rodent droppings. A representative said increase rodent control was added and no more rodents have been seen, however rodent droppings were seen on the top flap of the food bag. Food contaminated by rodent droppings could make dogs sick. Ensure that open supplies of food are stored in a manner that protects them from spoilage, contamination, and vermin infestation. Open supplies of food and bedding must be kept in leakproof containers with tightly fitting lids to prevent contamination and spoilage.

***Correct by 8/11/2026.

This inspection and exit interview were conducted with a facility representative.
