Site: 001

PEL-FREEZ, LLC

Type: ROUTINE INSPECTION

Date: 27-JUL-2026

2.31(d)(1)(ii)

Institutional Animal Care and Use Committee (IACUC).

IACUC approved Protocol 7 did not provide a written narrative description of the methods and sources used to determine that alternatives were not available to a procedure that may cause more than momentary pain or distress to the animals that is included in the protocol (use of Complete Freund's Adjuvant for antibody production). Whenever a proposal for animal use contains procedures that may cause more than momentary pain or distress to the animals, the IACUC shall determine that: (1) the principal investigator has considered alternatives to those procedures and (2) that the principal investigator has provided a written narrative description of the methods and sources used to determine that alternatives were not available. These requirements ensure that all procedures contained in the protocol minimize discomfort, distress, and pain to the animals. The IACUC needs to address this item. Correct by 8/28/26

2.31(e)(1)

Institutional Animal Care and Use Committee (IACUC).

More animals than approved were being used in a protocol. Protocol 7 was approved by the IACUC for 3 rabbits to be used for antibody production with 2 additional rabbits to be held in reserve if one of the original 3 animals became unusable prior to the first injection. For the duration of the project, 4 rabbits were being used for antibody production without any written approval from the IACUC for the increase in numbers. Proposed activities involving regulated animals should identify the number of animals to be used, however, any changes to the number of animals should be submitted to the IACUC for approval prior to conducting the activity. Correct from this day forward.

2.31(e)(2)

Institutional Animal Care and Use Committee (IACUC).

IACUC approved Protocols 7 and 8 do not include a rationale for the species or numbers of animals requested for the projects. The protocols simply state how many animals will be used. Including a rationale for the number of animals to be used allows the IACUC to conduct a thorough review of the use of animals in a research project. A proposal to conduct an activity involving animals, or to make a significant change in an ongoing activity involving animals, must contain a rationale: for involving animals, for the appropriateness of the species, and for the number of animals to be used. Complete information must be provided in a proposal for animal use for the IACUC to review the proposed animal use activities and determine that the proposed activities are in accordance with the requirements in this subchapter of the Animal Welfare Act. The IACUC needs to address this item. Correct by 8/28/26

Inspection Report

2.36(a)

Annual report.

The research facility did not submit their USDA FY 25 Annual Report to the Deputy Administrator on or before the extended deadline due date of 12/31/25. Research facilities that use or intend to use live animals in research, tests, experiments, or for teaching shall submit an annual report, that covers the numbers of animals used during the previous Federal fiscal year, to the Deputy Administrator on or before the December due date in this Subchapter of the AWA. Timely submission of the annual report is essential to provide an accurate accounting of the total number of animals used and to ensure that professionally acceptable standards governing the care and use of animals were followed during the previous Federal fiscal year reporting period. The research facility needs to submit their USDA FY 25 Annual Report by 8/10/26.

This inspection and exit interview were conducted with facility representatives.
