### 2.31(c)(7)

#### Institutional Animal Care and Use Committee (IACUC).

A review of records for pig #38309 indicate that on June 1, 2026 the animal underwent a surgical procedure as described in the associated IACUC approved protocol #202300000039. Records show that the administration of anesthetic and analgesic agents deviated from what was described in the protocol, resulting in the animal receiving multiple doses of Ketamine and an additional dose of Xylazine. In addition, the pig did not receive an oral dose of Meloxicam pre-operatively nor an intra-operative Bupivacaine intercostal injection.

Failure to follow the approved protocol and making unapproved changes does not allow the IACUC to review these changes as required and ensure the animals involved do not experience negative impacts to their health and welfare. The IACUC must ensure that all significant changes regarding the care and use of animals in ongoing activities are reviewed and approved prior to implementation. Currently, the IACUC has initiated preliminary steps towards correction.

\*\*\*\*\*Correct by August 31, 2026

### 2.31(d)(1)(ii)

#### Institutional Animal Care and Use Committee (IACUC).

IACUC approved Protocol #202300000039 did not provide a written narrative description of the methods and sources used to determine that alternatives were not available to procedures that are included in the protocol that may cause more than momentary pain or distress to the animals (thoracotomy and tracheotomy).

The IACUC shall determine that the principal investigator has considered alternatives to procedures that may cause more than momentary or slight pain or distress to the animals and has provided a written narrative description of the methods and sources used to determine that alternatives were not available. These requirements ensure that all procedures contained in the protocol minimize discomfort, distress, and pain to the animals. The IACUC needs to address this item identified for this protocol.

\*\*\*\*\*Correct by August 31, 2026

This inspection and exit interview were conducted with the facility representative.
