Site: 001
Jaybird Noel LLC

Type: ROUTINE INSPECTION
Date: 28-JUL-2026

2.33(b)(2)

Attending veterinarian and adequate veterinary care.

Two adult beagles, microchip numbers 933000321303321 and 933000321204465 were identified as having a moderate amount of thick, hard, brown, grey material (tartar) on the molars and premolars. The medical records, including the last annual exam, do not note this finding or any method of prevention or treatment.

Poor dental health can make it difficult to chew food, cause discomfort, and may lead to health issues. The facility shall ensure the use of appropriate methods to prevent, control, diagnose and treat diseases, such as dental disease, to ensure the health and well-being of the dogs. A system should be in place to identify dental issues and provide regular dental care.

Correct by August 15, 2026.

3.13(c)(1)

Veterinary care for dogs.

Medical records were not available at the time of inspection for three adult beagles. Two beagles, microchip numbers 933000321302784 and 933000321274283, were euthanized in June 2025 and one beagle, microchip #933000321182264, was euthanized in May 2025.

Medical records for dogs shall be kept and maintained by the research facility for the duration of the research activity and for an additional 3 years after the dog is euthanized or disposed of, and for any period in excess of 3 years as necessary to comply with any applicable Federal, State, or local law.

Correct from this day forward.

This inspection and exit interview were conducted with a facility representative.
