Type: ROUTINE INSPECTION

Date: 06-APR-2026

2.27(a)

Notification of change of operation.

During a routine inspection to evaluate a transport of hamsters, it was discovered that this facility did not have a valid site for this location, where regulated activity was being conducted.

Conducting regulated activity without a valid registration prevents APHIS officials from determining compliance with the Animal Welfare Act.

A registrant shall notify the Deputy Administrator by certified mail of any change in the name, address, or ownership, or other change in operations affecting its status as a carrier within 10 days after making such a change.

Corrected at time of inspection.

3.41(b) Critical

Handling.

The registrant handled primary enclosures transporting hamsters in a manner that caused physical trauma to the animals. Registrant representatives reported that, on March 16, 2025, the registrant loaded 12 hamsters in industry-standard cardboard enclosures onto a semi-trailer. At the first fuel stop and animal check, the driver discovered that a stack of enclosures (containing non-regulating animals) had collapsed, prompting the vehicle to return so damaged enclosures could be removed. After departing again and arriving at the destination, staff discovered more collapsed, damaged enclosures, with two hamsters found outside their enclosure—one deceased and one injured.

The registrant was aware that the stacked transport enclosures could collapse during transport but still failed to properly secure or handle the primary enclosures. As a result of the failure to exercise proper care in handling of transport enclosures, one hamster died, and another was injured and euthanized. The registrant's investigation attributed the collapse of and damage to the enclosures to the driver's failure to activate the vehicle's air suspension system. Care shall be exercised to avoid handling of the primary enclosure in such a manner that may cause physical or emotional trauma to the live hamsters contained therein.

Corrected prior to inspection.
