Tropical Birds Inc
17805 S W 188 Street
Miami, FL 33187

Customer ID: **6020000**

Certificate: **58-A-0384**

Site: 001

Tropical Birds Inc

Type: FOCUSED INSPECTION

Date: 08-JUL-2026

2.1(a)(1)(iv)

Requirements and application

The facility exceeded the maximum number of animals authorized under its USDA license. The USDA Class A Breeder Certificate authorizes a maximum inventory of 900 animals. The count during inspection was 1,565 birds.

Operating with a greater number of animals than authorized under the license may impede USDA Officials' ability to effectively evaluate and oversee licensing activities and ensure facilities are operating within the scope of their approved licensing authorization.

The facility must operate within the limits authorized by its USDA license. Either decrease the number of animals on hand or apply for a new license that allows for a greater number of birds. To be corrected by August 10, 2026.

3.153(a)(1)(iii)

Primary enclosures.

The facility failed to maintain a primary enclosure that securely contained the birds. During the inspection, a green-cheeked parakeet fledgling housed by the facility was observed outside of its primary enclosure and clinging to the exterior back wall of the enclosure. There was no observable damage or defects noted on the enclosure and facility representatives stated that the bird likely escaped during feeding. The bird was recaptured and returned to the enclosure.

Birds that are not securely contained may be unable to readily access food and water, and may be more vulnerable to injury, predation, or environmental hazards.

Primary enclosures must be constructed and maintained so that they securely contain the birds. To be corrected from this day, July 10, 2026, forward.

This inspection and exit interview were conducted with a facility representative.
