Type: ROUTINE INSPECTION
Date: 16-JUL-2026

2.33(a)(1)

Attending veterinarian and adequate veterinary care.

The facility does not have an approved written program of veterinary care with regularly scheduled visits to the research facility. The attending veterinarian accepted the position on May 27, 2026, after being appointed by the CEO of the research facility under formal arrangements, but has not yet approved a written program of veterinary care with regularly scheduled visits to the facility. Although regulated species and activities are not performed at the institution at this time, all USDA registrants are required to have a formal arrangement documented in writing and is necessary to assure veterinary oversight over the care and use of the animals at the facility. The formal arrangement between the facility and the part-time consulting veterinarian shall include a written program of veterinary care and regularly scheduled visits to the research facility.

Correct by: 09/01/2026.

2.36(a)

Repeat

Annual report.

The research facility still had not submitted their USDA fiscal year 2025 (FY25) Annual Report to the Deputy Administrator on or before the extended deadline due date of 12/31/25 since the last inspection. Per this Section, research facilities that use or intend to use live animals in research, tests, experiments, or for teaching shall submit an annual report, that covers the numbers of animals used during the previous Federal fiscal year, to the Deputy Administrator on or before the December due date in this Subchapter of the AWA. Timely submission of the annual report is essential to provide an accurate accounting of the total number of animals used and to ensure that professionally acceptable standards governing the care and use of animals were followed during the previous Federal fiscal year reporting period. The research facility needs to submit their USDA FY25 Annual Report.

Corrected at time of inspection.

This inspection and exit interview were conducted with facility representatives.
