Type: ROUTINE INSPECTION

Date: 20-JUL-2026

3.125(a) **Critical** **Repeat**

Facilities, general.

On April 7, 2026, a black rat snake was found in Seba's short-tailed bat enclosure. The black snake was immediately removed. A radiograph of the snake confirmed that 1 bat was consumed. The black rat snake was subsequently microchipped and released per the institution's wildlife management protocols. Since snake entry occurred despite the corrective measure taken from previous predation events, the decision was made to move the bat colony out of the exhibit. A fabrication company was hired to perform an extensive renovation of the Bat Cave.

The enclosure was not maintained in a manner that prevented the entry of an unwanted species resulting in the death of a bat. NOTE: At the time of inspection renovations were completed. The bats were moved into the Bat Cave on June 7, 2026, with no incidence of snake entry since.

Correct by ensuring that the Bat Cave is kept in good repair to protect the animals from injury.

This inspection and exit briefing were conducted with the facility representative.

Additional Inspectors:

GLORIA MCFADDEN, VETERINARY MEDICAL OFFICER
