Type: ROUTINE INSPECTION
Date: 17-AUG-2026

3.13(b)(3)

Veterinary care for dogs.

The facility does not maintain adequate medical records for the dogs. While reviewing medical records for vaccines there was 1 adult German Shepherd dog (Raven # 900219001673757) found to not have a current medical record for the administration of a DAPP/Lepto (7-way) vaccine. The Program of Veterinary Care states that adult dogs will receive the DAPP/Lepto (7-way) vaccine annually. The facility representative states the vaccine was administered, and this dog is up to date, but he forgot to document this on a medical record. The last recorded 7-way vaccine for this dog was administered on 27-August-2024.

Failure to record the names and dates for all treatments administered does not allow for APHIS officials to determine if adequate veterinary care has been provided for animals covered under the Animal Welfare Act. The licensee must ensure that the names of all vaccines and treatments administered, and the dates of administration are recorded and maintained.

Correct from this day 17-August-2026 and going forward.

This inspection and exit interview were conducted with the facility representative.
