Certificate: **73-A-2860**
Site: 001
Arden and Carol Plett

Type: ROUTINE INSPECTION
Date: 30-JUL-2026

2.1(b)(2)(i)

Requirements and application

The inventory for this current report is a total of 2,450 birds, upon review of the facility's license it is approved for up to 1950 animals. Licenses authorize increments of 50 animals on hand at any single point in time during the period of licensure. A licensee must obtain a new license before any change resulting in more than the authorized number of animals on hand at any single point in time during the period of licensure.

Correct by August 14, 2026.

3.158(d)

Cleaning, sanitization, housekeeping, and pest control.

The facility doesn't have an adequate pest control program for the building that contains birds. During the inspection, numerous flies were seen in and around the bird enclosures and old bird feed. There was also an accumulation of dead flies as well. While the facility does put out fly repellent, it is not effective in managing the fly population.

Pests, such as flies, can spread disease and contaminate food, surfaces, and animal housing areas. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests must be established and maintained to promote the health and well-being of the birds and reduce contamination by pests in animal areas.
To be corrected by August 10, 2026.

This inspection and exit interview were conducted with the licensee.
