Type: ROUTINE INSPECTION
Date: 09-JUL-2026

2.50(a)

Time and method of identification.

8 adult dogs don't have an appropriate form of identification. The licensee is currently using plastic tags affixed to enclosures to identify adult dogs. There are 5 puppies under 16 weeks of age, without their mother that don't have any official form of identification. Official identification is required for each dog at the facility and identification is necessary for APHIS officials to correctly identify dogs that receive medical treatment, are transported or sold, or otherwise removed from the facility.

All live adult dogs on the premises, purchased, or otherwise acquired, sold or otherwise disposed of shall be identified by an official tag affixed to the dog's neck by means of a collar, or shall be identified by a distinctive and legible tattoo marking approved by the Administration, or by microchip. All dogs less than 16 weeks of age born at the facility must be identified through use of a microchip, cage card, tattoo, or plastic type collar
To be corrected by 21 Aug 2026

3.13(b)(3)

Veterinary care for dogs.

The licensee is not maintaining records of preventative treatments provided to the dogs. The licensee stated that all routine vaccinations and preventative treatments are given to the animals according to the schedule on the written program of veterinary care but he is not maintaining records of these treatments. Recording routine treatments of the medications and vaccines provided to the dogs is important to allow APHIS officials to determine that the dogs are receiving adequate veterinary care. The licensee must record and maintain medical records that show all treatments and preventative care given to the dogs at the facility.
To be corrected by 15 July 2026

This inspection and exit interview were conducted with a facility representative.
