

Inspection Report

Fort Worth Zoological Park
1989 Colonial Parkway
Fort Worth, TX 76110

Customer ID: **3880**
Certificate: **74-C-0085**
Site: 001
Ft. Worth Zoological Park

Type: ROUTINE INSPECTION
Date: 28-APR-2026

3.75(e)

Housing facilities, general.

A tray of cut leafy greens and vegetables designated for the colobus to eat the next day is being stored without a lid. Not properly storing open food supplies may cause spoilage or contamination that can harm the animals. Only the food and bedding currently being used may be kept in animal areas, and when not in actual use, open food and bedding supplies must be kept in leakproof containers with tightly fitting lids to prevent spoilage and contamination. Corrected at time of inspection.

3.150(e)

Facilities, general.

In the food preparation area for penguins, there are cleaning detergents and other substances toxic to birds stored in the open under a stainless steel table. A bottle of dish soap is stored on top of the combination sink and cutting board surface station. Potential cross-contamination of chemicals with food for birds may cause harm to the animals. Substances such as cleaning supplies and chemicals that are harmful to the birds but that are required for normal husbandry practices must not be stored in food storage and preparation areas but may be stored in cabinets. Corrected at time of inspection.

This inspection and exit interview were conducted with the facility representatives.
