Type: FOCUSED INSPECTION
Date: 24-MAR-2026

2.131(b)(1) Critical

Handling of animals.

On June 3, 2025, two dogs were tendered for transport by an intermediate handler at the American Airlines Cargo Terminal in Los Angeles, CA. During the acceptance process, the intermediate handler placed a slip-collar leash on both animals and removed them from their kennels for security and screening purposes. The intermediate handler maintained control of one dog while handing the leash of the other dog to an airline employee. After the screening was completed, the intermediate handler placed the first dog back into its kennel. The second dog slipped free from the restraint and ran loose within the cargo warehouse. The dog eluded capture, bit one employee and exited the building toward the airfield. The dog crossed two active runways and bit a second person before it was recovered. The animal received veterinary care for injuries (avulsion to the paw pad and a torn dewclaw) sustained during the incident.

Failure to handle animals in a manner that maintains adequate control can result in physical harm or may have a negative impact on the health and well-being of the animal, as well as create a risk to public safety.

Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, behavioral stress, physical harm, or unnecessary discomfort. Corrective measures were implemented by the time of inspection on March 24, 2026.

This inspection and exit interview were conducted with a facility representative.
