Certificate: **74-C-1155**
Site: 001
Mystic Misfits

Type: ROUTINE INSPECTION
Date: 19-MAY-2026

3.127(d)

Facilities, outdoor.

The facility housing two hyenas and various other mammals was not enclosed by an 8' tall perimeter fence in the following areas:

- The fence along the road, on the west side of the facility, has been removed and construction is being done for a new fence leaving the area without a perimeter fence.
- There was a section of fencing on the northwest side where a tree had fallen across the fence from the outside making the fence approximately 5' high for about 6-8'. (Corrected at the time of inspection.)
- There was a 10' gate north of the bear enclosure with a one foot gap under about half the gate. (Corrected at the time of inspection.)
- The 10' gate had a gap where it should have been latched to the perimeter fence (the opposite side from the hinges) that was approximately 1' wide. The gate was leaning at the top away from the perimeter fence. (Corrected at the time of inspection.)

An incomplete and inadequate perimeter fence can allow animals and unauthorized persons to enter the facility and have contact with the animals.

All outdoor housing facilities must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. Fences less than 8 feet high for potentially dangerous animals must be approved in writing by the Administrator. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

To be corrected by June 1, 2026.

This inspection and exit interview were conducted with the licensee.
