Type: ROUTINE INSPECTION

Date: 12-MAY-2026

3.80(a)(2)(i)

Primary enclosures.

In both the lemur and swamp monkey holding enclosures there were sharp points on wire mesh used to reinforce gaps, add traction on ramps or create additional enrichment and feeding receptacles. Primary enclosures housing non human primates must be constructed and maintained so that they have no sharp points or edges that could injure the nonhuman primates in order to ensure their welfare.

Corrected during inspection.

This inspection and exit interview were conducted with the Attending Veterinarian and the Director of Animal Care.
