Inspection Report

The Dallas World Aquarium

1801 N Griffin St
Dallas, TX 75202

Customer ID: **6545**

Certificate: **74-C-0392**

Site: 001
The Dallas World Aquarium

Type: ROUTINE INSPECTION

Date: 17-JUN-2026

2.40(a)(1) **Direct**

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The Dallas World Aquarium does not currently have an attending veterinarian. On May 20, 2026, the attending vet resigned from her position and is no longer consulting nor on call. The incoming attending veterinarian is potentially scheduled to start July 20, 2026. Failure to have an attending veterinarian has contributed to numerous animals having veterinary care issues at the facility. Each exhibitor shall employ an attending veterinarian under formal arrangements. An attending veterinarian must be employed to ensure the animals are provided adequate veterinary care.
Correct immediately.

2.40(b)(3) **Direct**

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

APHIS officials observed ID 13A067, a female 13-year-old Little Blue Penguin unable to stand or hold herself up. She was dragging her front end and face along the soft sided enclosure. She repetitively attempted to right herself without success. She fell onto her face and was unable to maintain an upright posture. At one point ID 13A067 flopped over and was unable to right herself. This behavior continued for the approximate 30 minutes the APHIS officials were in the room. ID 13A067 was under medical care since April 21, 2026, for possibly being eggbound and occasionally stumbling. Failure to notify the attending veterinarian in a timely manner can delay treatment and cause further animal suffering. The facility has not communicated the animals' condition to any veterinarian.

Two Jacanas reportedly suffered from broken necrotic toes and are still at the facility clinic under general staff observation. The animal's condition has also not been reported to any veterinarian.

On 1 June 2026 a single young Oropendola was found outside of the nest, weak and in need of care. The animal was taken to the facility clinic for treatment. This bird has not been seen by a licensed veterinarian. The animal is still present in the facility.

A crimson-rumped Toucan (ID# 21H061) has been under treatment for an eye problem at the facility clinic for multiple weeks. A treatment sheet dated 30 May 2026 states that Lasix 10 mg/mL was prescribed for treatment by the owner of the facility. The facility does not have an attending veterinarian at this time, and the owner is not a licensed veterinarian. The animal's condition has also not been reported to the attending veterinarian.

Inspection Report

Communicating timely and accurate information on problems of animal health, behavior, and well-being to the attending veterinarian is necessary to ensure animals receive adequate veterinary care and to avoid unnecessary pain and suffering.

All birds must be seen by a licensed veterinarian by 12 PM on June 18, 2026.

2.75(b)(1)

Records: Dealers and exhibitors.

2.75 (b)(1)
The provided acquisition records were inadequate and inanccurate for the 16 recently acquired Wattled Jacanas. An invoice for 12 Wattled Jacanas was provided and the manager stated they weren't charged for the 4 sick birds. Adequate acquisition paperwork is important for disease tracking and accurate animal records.
Correct from this date forward.

3.125(c)

Facilities, general.

Dead cockroaches were found in the fridge where freshly prepared animal feed is stored. Food shall be protected from contamination. The fridge must be cleaned immediately.
Corrected at the time of inspection

3.131(c)

Sanitation.

The light fixture casing in the lockout area for the Giant River Otters has accumulated algae contaminated water. This is a potential source of contamination of the enclosure. Fixture must be maintained in good repair.
Corrected at the time of inspection

This inspection and exit interview were conducted with a facility representative.

You may appeal all or part of any inspection report by submitting a written statement contesting the findings—along with any supporting documentation—to the Deputy Administrator. Appeals of routine, focused, or attempted inspections must be received within 21 days of report issuance as shown by the signature line of this report.

Appeals may be sent by email to AnimalCare@usda.gov.

Appeals sent by mail should be addressed to:
