Home of the Wild Ranch

Type: NEW SITE INSPECTION
Date: 10-FEB-2026

3.125(a)

Facilities, general.

At the time of the inspection, there were several enclosures with exposed gridwall, metal framework - with approximately 4 x 4 inch panels - overlying the dirt of the entire enclosure floor, whereby there were large gaps both between and underneath the framework of the following animals: African Crested Porcupines (one male and one female), Patagonian Cavy's (two males), one racoon, Fennec foxes (one male and one female), and Bat Eared foxes (one male and one female). In the porcupine enclosure, there was also a single row of exposed sharp points of metal (protruding approximately 4 inches from the cement lining the perimeter floor of the enclosure) overlying the dirt of the entire front wall of the enclosure. Sharp points, exposed metal framework, as well as the surrounding gaps/holes (some of which were dirt holes dug by the animals) pose an entrapment/injury risk to the animals contained therein. The indoor and outdoor housing facilities must be structurally sound and must be maintained in good repair to protect the animals from injury.

Correct by: February 24, 2026

This inspection was a site approval inspection.

This site is not ready for approval to conduct activity covered under your current Animal Welfare Act License.

Conducting regulated activities at a non-approved site is a violation of the Animal Welfare Act.

Please contact your inspector to schedule your next new site approval inspection.

This inspection and exit interview were conducted with the licensee.
