### 2.75(b)(1)

#### Records: Dealers and exhibitors.

Inventory records had not been updated to reflect the births of rabbits at the facility. Records must be maintained and updated to accurately represent the total number of animals held at the facility, including animals sold, or any offspring born. The facility must correct this issue.

\*\*\*\*\*Correct by September 22, 2026

### 3.53(a)(1)

#### Primary enclosures.

Multiple rabbit enclosures were identified with exposed screw/nail heads, and areas of worn and jagged wood. The animals could potentially become injured when enclosures are not maintained in good repair. In addition, chewed and jagged wood may contain debris and cannot be effectively sanitized. The facility must ensure that animal enclosures are maintained in good repair in order to protect the animals.

\*\*\*\*\*Correct by September 22, 2026

### 3.56(a)(1)

#### Sanitation.

Multiple rabbit enclosures were identified with an excessive buildup of fecal material and debris. Fecal material may harbor disease causing agents and may negatively affect the health of the animals. Enclosures must be reasonably free of excreta and other debris by periodic cleaning, in addition to being sanitized at least once every 30 days. The facility must address this issue.
