Certificate: **58-C-1152**

Site: 001

Mystic Jungle Educational Facility
Inc

Type: ROUTINE INSPECTION

Date: 09-SEP-2026

3.78(d) Repeat

Outdoor housing facilities.

The two outdoor enclosures housing two ring-tailed lemurs, one common lemur, and one rhesus macaque do not have a sufficient perimeter fence. These enclosures are outside the facilities' eight foot perimeter fence and do not have a complete perimeter fence at least 6 feet tall fully around these enclosures.

An insufficient perimeter fence can allow unwanted animals or people to enter the facility and potentially harm the animals within. The perimeter fence must be constructed so that it protects nonhuman primates by restricting unauthorized humans, and animals the size of dogs, skunks, and raccoons from going through it or under it and having contact with the nonhuman primates. It must be of sufficient height (at least six feet high) to keep unwanted species out. It must be of sufficient distance (at least three feet) from the outside wall or fence of the primary enclosure to prevent physical contact between animals inside the enclosure and outside the perimeter fence.

3.125(a) Repeat

Facilities, general.

There are multiple enclosures that are not being kept in good repair. In an enclosure housing two raccoons one of the lower horizontal enclosure fence bars have rusted through creating holes with jagged edges that the animals can access. In an enclosure housing the mountain coati there is an enclosure fence corner from a vertical bar to the lower enclosure fence bar it rusted through. In the kinkajou enclosure the food bowl holder is rusted through and has sharp edges. In the enclosure housing 1 female tiger there are multiple screws standing 1-1.5 inches above the surface that the tiger can rest or stand on.

Enclosures that are not kept in good repair, including areas of excessive rust, can result in injury to the animals from sharp or jagged edges. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The housing facilities shall be maintained in good repair to protect the animals from injury and to contain the animals.

This inspection and exit interview were conducted with facility representatives.
