Site: 001

Peeps and Creeps Inc.

Type: ROUTINE INSPECTION

Date: 10-JUN-2026

3.125(a)

Repeat

Facilities, general.

In a large outdoor pen housing one adult domestic pig, there is a shelter constructed of wood and sheet metal which has places where the sheet metal is torn or otherwise has sharp edges that could come into contact with the animal. Sharp edges and points can injure animals. The licensee must ensure that housing facilities are structurally sound and maintained in good repair to protect the animals from injury and to contain the animals.

3.129(a)

Feeding.

A feeding trough in the enclosure housing one Bactrian camel, one zedonk, one zebra, one llama and one alpaca is full of rotting vegetables and fruits. There is a strong odor coming from the trough which is drawing flies. Spoiled foods can cause illness in animals and attract pests and vermin that can cause harm or illness to animals. The licensee must ensure that food offered to animals be wholesome, palatable, and free from contamination and of sufficient quantity and nutritive value to maintain all animals in good health. The diet shall be prepared with consideration for the age, species, condition, size, and type of the animal. Animals shall be fed at least once a day except as dictated by hibernation, veterinary treatment, normal fasts, or other professionally accepted practices.
TO BE CORRECTED BY 06/12/2026

3.131(c)

Repeat

Sanitation.

**There is discarded twine on the ground inside a pen accessible to one Bactrian camel, one adult llama, one zedonk, one zebra and one adult alpaca. This material poses a risk of illness due to ingestion.
**There is a soiled, torn up fabric and foam cushion inside the enclosure of one adult male bobcat named "Sweet Pea". Damaged items left in animal areas can attract and harbor pests and vermin that can cause harm or illness to animals. The licensee must ensure that premises are kept clean, free of trash accumulation, and in good repair in order to protect animals from injury and illness and to facilitate the prescribed husbandry practices set forth in the regulations.

This inspection and exit interview were conducted with a facility representative.
