Beaches Inc

Type: ROUTINE INSPECTION

Date: 29-MAY-2026

2.131(b)(1) Critical

Handling of animals.

The facility failed to handle a bird with the necessary care to prevent injury. On March 25, 2026, a male lorikeet (#225011), was being transferred between holding areas when the door was not closed quickly enough, resulting in the bird becoming entrapped and subsequently dying.

Handling errors can have severe or fatal consequences for birds due to their unique anatomy and behavioral responses. Because birds often panic when startled, even a brief lapse in handling technique can escalate into a life threatening incident. For these reasons, consistent, deliberate, and well coordinated handling practices are critical to ensuring their safety and welfare.

Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort. Correct this day, May 29, 2026, forward.

3.153(a)(1)(iii) Critical

Primary enclosures.

The facility failed to secure a Rosybill duck in its' enclosure. On November 12, 2025, a Rosybill duck (#203189) was reported missing from its' primary enclosure. No signs of a struggle were found. No feathers were found. There was no evidence of predators breaching the enclosure fence. The wading pool was drained and there was no evidence of a carcass or feathers. There is no public interaction with the animals. The public observes the exhibit from a suspended bridge approximately 20ft high. The whereabouts of the duck could not be determined by the facility.

Enclosures must be constructed to contain the animals within and prevent predators from entering. Birds that escape their enclosures may be restricted in their access to food, water, and shelter, and are at increased risk of predation and injury.

Primary enclosures must be designed and constructed of suitable materials so that they are structurally sound. The primary enclosures must be kept in good repair. Primary enclosures must be constructed and maintained so that they contain the birds securely. Correct this day, May 29, 2026, forward.
