Inspection Report

The Tropical Rain Forest Preserve Inc

163 66th Terrace South
West Palm Beach, FL 33413

Customer ID: **36400**

Certificate:

Site: 001
The Tropical Rain Forest Preserve Inc

Type: RE-LICENSE INSPECTION

Date: 30-SEP-2026

3.78(d)

Outdoor housing facilities.

The facility does not have a 6 ft perimeter fence. One-third of the eastern side and the entire southern side are approximately 4 ft high, with two thirds of the southern fence obscured by dense foliage. Boards, equipment, and miscellaneous building materials are stacked against the fence in both the northwest and southwest corners.

An inadequate perimeter fence leaves the facility vulnerable, creating opportunities for intruders or wild animals to enter and potentially compromises the safety and well-being of the animals. Thick vegetation and stored objects along the perimeter fence hinder assessment of its structural integrity, obscure potential wildlife-made holes, and provide shelter for pests like rodents. They can also act as a ladder, increasing the risk of animal escape.

An outdoor housing facility must be enclosed by a fence that is of sufficient height to keep unwanted species out. Fences less than 6 feet high must be approved by the Administrator. The fence must be constructed so that it protects nonhuman primates by restricting unauthorized humans, and animals the size of dogs, skunks, and raccoons from going through it or under it and having contact with the nonhuman primates. It must be of sufficient distance from the outside wall or fence of the primary enclosure to prevent physical contact between animals inside the enclosure and outside the perimeter fence. Such fences less than 3 feet in distance from the primary enclosure must be approved by the Administrator. To be corrected by the next scheduled relicense inspection.

3.127(d)

Facilities, outdoor.

The facility does not have a 6 ft perimeter fence. One-third of the eastern side and the entire southern side are approximately 4 ft high, with two thirds of the southern fence obscured by dense foliage. Boards, equipment, and miscellaneous building materials are stacked against the fence in both the northwest and southwest corners.

An inadequate perimeter fence leaves the facility vulnerable, creating opportunities for intruders or wild animals to enter and potentially compromises the safety and well-being of the animals. Thick vegetation and stored objects along the perimeter fence hinder assessment of its structural integrity, obscure potential wildlife-made holes, and provide shelter for pests like rodents. They can also act as a ladder, increasing the risk of animal escape.

Inspection Report

All outdoor housing facilities must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. To be corrected by the next scheduled relicense inspection.

This is a 2nd Re-License Inspection for a Class “B” license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 1 more inspection or by October 18, 2026, or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

You may appeal this finding in writing by October 8, 2026.

Appeals may be sent by email to AnimalCare@usda.gov.

Appeals sent by mail should be addressed to:
Deputy Administrator
APHIS Animal Care (AC)
U.S. Department of Agriculture
2150 Centre Avenue, Building B
Mailstop #3W11
Fort Collins, CO 80526-8117

Regulated activity can continue under your existing USDA license until it expires.
