3.6(a)(2)(x)

Primary enclosures.

The flooring of 5 outdoor runs of the sheltered housing facility was not being maintained in a manner that will protect the dog's feet and legs from injury. The kennel utilizes greenhouse style flooring. There were holes in the flooring from excessive wearing and chewing that resulted in large openings where the dogs' feet and legs could pass through and cause injury, or could be a potential entry point for a predator. The holes measured were approximately 3"x 3" to 6" x 6". Correct by ensuring that primary enclosures be constructed and maintained so that they have flooring that protects the dogs' feet and legs from injury and the feet and legs cannot pass through the floor. Correct by November 21, 2026.

This inspection and exit interview were conducted with the licensee.
