Type: ROUTINE INSPECTION

Date: 26-MAY-2026

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

An APHIS official observed a supplement (Bene-Bac Plus) in the food preparation area that was expired (best-by-date April 2025). According to a facility representative, this supplement had been administered to the two North American river otters past its expiration date. Use of expired supplements does not constitute the standard of care as they may not be safe or effective. The facility must ensure that it maintains a program of adequate veterinary care that includes the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries. Correct by June 2, 2026.

This inspection and exit interview were conducted with a facility representative.
