3.6(a)(2)(i)

Primary enclosures.

Within the primary enclosure of four juvenile large breed dogs were two pieces of corrugated sheet metal, the type used as siding and roofing. The dogs were seen running around, standing and lying on the sheets of metal. Primary enclosures with sharp points or edges could cause injury to the animals held within them. The licensee must construct and maintain all primary enclosures so that they do not have sharp points and edges.
Corrected during the inspection.

This inspection and exit interview were conducted with the licensee.
