Type: ROUTINE INSPECTION
Date: 26-FEB-2026

3.81(c)(4)

Environment enhancement to promote psychological well-being.

A review of the facility's Environment Enhancement Program For Nonhuman Primates (NHPs) does not include special attention for a singly housed approx. 12-year-old female Black-and-White Ruffed Lemur named Olivia.

Failure to provide special attention to individually housed NHPs could result in psychological distress that could negatively affect the well-being of social NHPs if kept in this manner.

Certain nonhuman primates must be provided special attention regarding enhancement of their environment, based on the needs of the individual species and in accordance with the instructions of the attending veterinarian. Nonhuman primates requiring special attention are the following: Individually housed nonhuman primates that are unable to see and hear nonhuman primates of their own or compatible species.

Correct by March 13, 2026, and forward.

This inspection and exit interview were conducted with the licensee and AV.
