Certificate: **41-B-0254**
Site: 001
GO Aquatics LLC

Type: RE-LICENSE INSPECTION
Date: 17-MAR-2026

3.28(a)(1)

Primary enclosures.

The enclosure for 9 Russian dwarf hamsters had sharp wire points by their water and food rack that hamsters could touch when they eat/drink. Surfaces for hamsters must be smooth and sharp wire points could injure the hamsters. Ensure to maintain surfaces in good repair with smooth surfaces to protect hamsters from injury.

3.30

Watering.

A water bottle for 5 guinea pigs had a greenish build-up seen when looking down on the enclosure. The buildup was touched and could not be wiped off from the outside and confirmed to be inside the bottle. Green build-up in a water bottle is a sign that it is dirty and dirty water bottles could make guinea pigs sick. Ensure to clean and sanitize water bottles at least every two weeks but sooner if they are dirty.

3.31(b)

Sanitation.

The facility does not maintain an adequate level of housekeeping for the room which houses guinea pigs and hamsters. A table used to box guinea pigs and hamsters for shipping has rodent feces, used bedding, and dust scattered throughout the table surface. A ring of debris and rodent feces outlines a five-gallon plastic bucket locating on the table, indicating this table has not been cleaned recently. According to the facility, the floor of the guinea pig and hamster room was recently mopped. Inspectors observed dirt spanning multiple linoleum tiles adhered to the floor in several locations of the room.

Areas that are not kept clean and in good repair may promote bacterial growth or encourage pests, and therefore may subsequently impact overall animal health and lead to disease.

The building and grounds shall be kept clean and in good repair to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart, as well as remain free of accumulations of trash.

The licensee must demonstrate full compliance with the Act, regulations, and standards within 1 more inspections or by March 20, 2026, or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your
