Type: ROUTINE INSPECTION
Date: 17-MAR-2026

3.125(a)

Facilities, general.

An outdoor enclosure housing seventy-five goats was not being maintained properly and had several exposed nails and screws within reach of the animals. The elevated walking platforms had screws exposed on the walking surface. The elevated shelter had several screws exposed with some having goat hair around the screws. The enclosure fence had a board that had fallen to the ground with several screws with sharp points that could contact the animals. There is a potential source of injury to the enclosed animals. The sharp points and screws need to be removed or secured. All housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury. Corrected at time of inspection.

This inspection and exit interview were conducted with a facility representative.
