Site: 001

ENCHANTED SPRINGS RANCH

Type: ROUTINE INSPECTION

Date: 05-MAY-2026

2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

An adult female Pere David's deer was observed with swelling beneath her right eye. The swelling encompassed all of her lower eyelid and extended towards the top of her cheek and inner corner of the right eye. The eye was open and her vision was not impaired. No visible discharge, redness, bruising, nor open wounds were seen. The facility had not observed the swelling prior to inspection.

Swelling that expands underneath the eye can cause pain and unnecessary discomfort. Inadequate daily observations inhibit adequate monitoring for changes to an animals health. This results in delay of care and potentially to prolonged suffering.

Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include daily observation of all animals to assess their health and well-being. A mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian.

Correct by 5/26/26.

2.75(b)(1)

Records: Dealers and exhibitors.

There were no records of acquisition, disposition, or records of animals on hand available at the time of inspection for any of the regulated animals present at the facility.

A complete record of animals is required to trace and track animals being used in regulated activities to ensure their humane care and use.

Every dealer and exhibitor shall make, keep and maintain records or forms that fully and correctly disclose the required information, which includes: the name and address of the person from whom the animals were acquired, the USDA license number of the person if licensed or the vehicle license number and state and driver's license number and state if not licensed, the name and address of the person to whom an animal was given/sold, the date of acquisition or
