Certificate: **56-B-0149**

Site: 001
Trenton Estes

Type: ROUTINE INSPECTION

Date: 21-SEP-2026

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The attending veterinarian (AV) has not visited the facility on an annual basis, as written in the program of vet care. During this inspection, the licensee told the inspector the AV visited the facility during the 2026 calendar year but was unsure of the date. When the inspector contacted the AV, they stated they've never visited the facility at the current location, or the prior address in Chester, South Carolina. At the time of this inspection, the AV hasn't been scheduled to visit the facility since the licensee initially contacted them in 2024.
Consistent, regularly scheduled visits by the veterinarian provide a measure of quality assurance and helps sustain satisfactory oversight and communication by the vet with the facility. The facility shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the facility.

Correct by October 10, 2026.

2.75(b)(1)

Records: Dealers and exhibitors.

The facility did not have acquisition records for two marmosets and one mini-pig. Additionally, no disposition records were available for the same mini-pig. Though the licensee stated the marmosets housed at the facility are personal pets, the primates are on display to the public during the reptile tours.

Acquisition and disposition records, including offspring born at the facility, are necessary to accurately track and identify animals being used in regulated activities, as well as aid in the detection of movement of animals upon relocation to a new site. The licensee shall make, keep, and maintain records of acquisition/disposition of all animals that fully and correctly disclose the required information, as outlined in this section.

Correct by September 26, 2026.

Inspection Report

Environment enhancement to promote psychological well-being.

The facility does not have a written primate enrichment program for the marmosets housed at the facility. Three marmosets are housed in the back area of the pet store where guided reptile tours occur. While the licensee stated the marmosets are personal pets that remain at the pet store, they are housed in the same room as the reptiles included in the tour and remain on display to the public as the tour is being conducted. During this inspection, a facility representative confirmed they'd conducted reptile tours while the marmosets were housed in the back room.
Implementing documented enrichment protocols ensure adequate provisions are in place to promote the psychological well-being of the non-human primates at the facility as directed by the attending veterinarian. The facility must develop, document, and follow an appropriate plan for environmental enhancement adequate to promote the psychological well-being of nonhuman primates. The plan must be in accordance with the currently accepted professional standards as cited in appropriate professional journals or reference guides, and as directed by the attending veterinarian. This plan must be made available to APHIS upon request.

Correct by October 10, 2026.

This inspection and exit interview were conducted with the licensee and facility representatives.

You may appeal all or part of any inspection report by submitting a written statement contesting the findings—along with any supporting documentation—to the Deputy Administrator. Appeals of routine, focused, or attempted inspections must be received within 21 days of report issuance as shown by the signature line of this report.

Appeals may be sent by email to AnimalCare@usda.gov.

Appeals sent by mail should be addressed to:
