TROWBRIDGE CREEK ZOO LLC

Type: ROUTINE INSPECTION

Date: 15-APR-2026

2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

An umbrella cockatoo has missing feathers and a full thickness almond-shaped wound approximately one inch in length on its right breast area. The exposed tissue feels dry and papery, is not apparently painful to the touch, and does not appear inflamed or infected. The facility stated that the bird has exhibited self-injurious behaviors since they acquired the bird six years ago. While the animal's self-injurious behaviors have improved overall, this wound will recurrently scab or start to heal over and then recur. The program of veterinary care does not address wound care. The facility stated that they have discussed the self-injurious behavior with the attending veterinarian (AV) within the last four months but had not specifically contacted the AV when the bird had most recently removed the scab/healing skin. The AV stated he was not aware that this was a cyclical issue.

Self-injurious behavior in birds may indicate an underlying psychological or medical condition. Veterinary assessment is crucial to evaluating medical diseases or environmental stress. Veterinary assessment is also valuable when evaluating the environmental enhancement plan for the special considerations birds with psychological distress need. Communicating updates on changes to chronic and recurring conditions may provide the veterinarian information that guides assessment and treatment recommendations.

The licensee must ensure that thorough daily observations are conducted and continued timely and accurate communication regarding problems of animal health, behavior, and well-being are conveyed to the attending veterinarian.

Correct by April 20, 2026

2.75(b)(1)

Records: Dealers and exhibitors.

The facility has not maintained records which fully and correctly disclose the following information concerning animals in their possession or animals otherwise disposed of by the exhibitor. Missing information includes the name and address of the person from whom the animals were purchased or otherwise acquired, the name of address of the person to whom an animal was sold or given, and the date of acquisition (i.e. purchase date or birth date if born on the property). The incomplete records were observed for a ring-tail lemur, hybrid macaw, domestic goats and sheep, red deer, north American porcupine, and wolves.

Inspection Report

Appropriate documentation of regulated animals is essential for proper identification, to trace and track animals in case of disease outbreak, and to ensure all parties that are required to be licensed have a current, valid license.

Every dealer shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning animals, other than dogs and cats, purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of by that dealer or exhibitor. The records shall also include any offspring of any animal while in his or her possession or under his or her control.

Correct by May 7, 2026.

This inspection and exit interview were conducted with facility representatives.
