Two zebu cattle have overgrown hooves. Zebu cattle #1 has overgrown front and hind hooves of approximately 1 inch in length and Zebu #2 has overgrown front hooves, approximately 1.5 to 2.0 inches in length. The overgrown hooves of these animals did not appear to cause any lameness or gait abnormalities at time of this inspection. The overgrowth of hooves may cause the animals discomfort and lead to injuries or lameness if not appropriately addressed. The facility must establish and maintain an adequate program of veterinary care that includes a timely schedule of hoof trimming and care. To be corrected by May 15, 2026

This inspection and exit interview were conducted with the facility representatives.
