

Inspection Report

Pedro Kauenhofen
PO Box 67
Paden, OK 74860

Customer ID: **6020627**
Certificate: **73-A-2874**
Site: 001
Pedro Kauenhofen

Type: ROUTINE INSPECTION
Date: 08-SEP-2026

2.1(b)(2)(i)

Requirements and application

- The licensee has gone over the allowed animal maximum on their USDA license. There were more than 8000 adult and juvenile animals present at the facility. The licensee is currently licensed for a maximum of 6050 animals. The USDA license authorizes the maximum number of animals per license. This information helps ensure that all animals can be adequately housed and cared for.
A licensee must either obtain a new license with an appropriate maximum number of animals or reduce the number of animals at the facility to below the maximum number of allowed animals.
Correct by 1 November 2026

3.153(a)(2)

Primary enclosures.

- In the first housing barn, two long cages housing juveniles had an inadequate number of perches to comfortably house all the parakeets contained in the enclosures. An enclosure housing perching birds must have a sufficient number of perches of appropriate size, shape, strength, texture, and placement to comfortably hold all the birds in the primary enclosure at the same time. A lack of adequate perching space can cause physical and emotional stress to the enclosed birds and have a negative impact on the welfare of the animals. The facility must ensure that all cages have a sufficient number of appropriate perches to house all enclosed animals at the same time.
Correct by: 16 September 2026

3.158(d)

Cleaning, sanitization, housekeeping, and pest control.

- There was an excessive number of flies present in the interior portion of the first housing barn. Flies were clustered at different locations throughout the facility, most noticeably on the catch trays underneath bird cages. Flies are an irritant and a potential source of contamination to the enclosed animals. The facility must institute an appropriate and effective method of fly and pest control to ensure adequate levels of control and to help protect the health and welfare of the enclosed animals.
