Type: ROUTINE INSPECTION

Date: 24-MAR-2026

3.153(a)(1)(vii)

Primary enclosures.

An outdoor enclosure housing one grey-winged trumpeter and a second outdoor enclosure housing two Stanley cranes did not provide adequate shade to these birds at time of inspection. Enclosures with insufficient shade for the birds may potentially cause overheating or discomfort. Primary enclosures must be constructed and maintained so that they provide sufficient shade to comfortably shelter all birds housed in the primary enclosure at one time, including low ranking birds that are maintained in social groupings that form dominance hierarchies.

Correct by 04/10/2026.

This inspection and exit interview were conducted with facility representatives.
