Sandy Oak Ranch, LLC
1144 West 700 North
Lake Village, IN 46349

Customer ID: **6016778**

Certificate: **32-C-0293**

Site: 001

Sandy Oak Ranch LLC

Type: ROUTINE INSPECTION

Date: 03-JUN-2026

2.40(b)(2)

Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The facility did not communicate timely and accurate information on all problems of animal health to the attending veterinarian. The animals affected are as follows:

** Two young black and white goats were observed with limb issues. One of the goats had a clear limp on its front right leg, but could stand and walk. The other goat was standing on three legs and holding up its rear right leg. It was reluctant to move; the inspector did not observe the goat walking.

According to a facility representative, the goats' limb issues were identified in the past few days. The goat with the forelimb issue had intermittent problems since he was born, but the representative did not observe a significant medical concern until very recently. According to the attending veterinarian, a representative sent a text message to the veterinarian about two goats with a "hoof problem" on Monday, June 1, two days prior to the inspection, and made an appointment for Wednesday, June 10. The attending veterinarian was unaware of the severity of the problem and stated that a goat that cannot bear weight on its leg should receive veterinary care sooner than 10 days after the problem was identified.

** An adult white-tailed deer was observed with a poor coat and appeared very thin. The spine, scapula, and hips were prominent and the animal had unkempt and patchy fur loss on the back and sides. The attending veterinarian stated that he examined the deer on May 2, 2026 (about 30 days before the inspection) and advised de-worming and monitoring nutrition, with further diagnostics such as bloodwork and fecal testing if the animal did not improve. A facility representative reported that the diarrhea improved, but the animal's body condition or fur condition did not significantly improve. A facility representative has not communicated any updates on this animal's health since May 8, 2026, and has not scheduled any follow-up diagnostics.

Failing to communicate timely and accurate information on problems of animal health and well-being to the attending veterinarian has prevented the attending veterinarian from providing adequate veterinary care to these animals.

Correct by ensuring these animals are evaluated by a veterinarian and ensuring to communicate timely and accurate information on problems of animal health and well-being to the attending veterinarian. Correction date: 6/5/2026.
