Type: FOCUSED INSPECTION

Date: 21-APR-2026

2.31(d)(1)(ii)

Institutional Animal Care and Use Committee (IACUC).

An IACUC approved Protocol #25006 did not provide a written narrative description of the methods and sources used to determine that alternatives were not available to a procedure that may cause more than momentary pain or distress to the animals that is included in the protocol (cesarean section).

Whenever a proposal for animal use contains procedures that may cause more than momentary pain or distress to the animals, the IACUC shall determine that the principal investigator has considered alternatives to those procedures and the principal investigator has provided a written narrative description of the methods and sources used to determine that alternatives were not available. This requirement ensures that all procedures contained in the protocol minimize discomfort, distress, and pain to the animals. The IACUC needs to ensure all protocols submitted that contain any procedure that may cause more than momentary or slight pain or distress to the animals are in compliance with this section of the regulations.

Correct by 05/15/2026.

This inspection and exit interview were conducted with a facility representative.
