Type: ROUTINE INSPECTION

Date: 28-SEP-2026

2.40(b)(2) **Critical**

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The facility reported that on May 30, 2026, that five rabbits identified for euthanasia were discovered deceased in a transfer cart. On May 29, 2026, these rabbits were determined to require euthanasia after being observed as moribund. According to the facility, the technician placed the rabbits in the transfer cart and moved them to the appropriate holding area, and informed another technician who was responsible for performing the euthanasia. The animals were discovered deceased the next morning.
Failure of animal care personnel to perform treatments as directed can lead to stress, physical harm and death. Facilities shall maintain programs of adequate veterinary care that include appropriate methods to prevent, control, diagnose, and treat diseases and injuries.
Correct: correction prior to inspection date.

2.131(b)(1) **Critical**

Handling of animals.

The facility reported that they had two separate issues where rabbits were restrained for tattooing, and the four total rabbits had to be euthanized. On July 17, 2026, two rabbits were injured during tattoo identification procedures, wherein the restrainer was too large for the body size of these rabbits. According to the facility, the additional space allowed the animals to kick out of the restraint, resulting in injuries requiring euthanasia. During the week of August 3, 2026, two additional rabbits were injured during the same procedure, also requiring euthanasia. According to the facility, a supervisor had instructed employees to manually restrain rabbits with additional padding to overcome overly large restraint devices, but the method was not employed as directed. Failure of animal care personnel to handle animals properly can lead to stress, injuries, and death. Handling of animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, behavioral stress, physical harm, or unnecessary discomfort.
Correct: correction prior to date of inspection.

This inspection and exit interview were conducted with the facility representatives.

You may appeal all or part of any inspection report by submitting a written statement contesting the findings—along with any supporting documentation—to the Deputy Administrator. Appeals of routine, focused, or attempted inspections must
