Inspection Report

Morgan City Petting Zoo

725 Myrtle St
Morgan City, LA 70380

Customer ID: **7257**

Certificate: **72-C-0171**

Site: 001
Morgan City Petting Zoo

Type: ROUTINE INSPECTION

Date: 24-SEP-2026

2.40(a)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

At the time of the inspection, there was no documentation of the last veterinary visit. The zoo manager provided the written program of veterinary care afterwards. The clinic listed on the 7002 form was contacted by telephone after the inspection and two veterinarians stated that they were not aware of being the official attending veterinarian and took no part in filling out the 7002, nor were aware of its existence. The veterinarians did say that they have a business relationship with the petting zoo and do come out at least annually to provide preventive care to all the animals possible. The dates of the last two year's visits were given as June 9, 2026, September 23, 2025, February 4, 2025, and December 28, 2024.

The licensee must give the attending veterinarian the authority to oversee the adequacy of other aspects of animal care and use. The attending veterinarian should also work with the licensee or registrant to determine appropriate husbandry, nutrition, hoof care, specialized needs for the care of young or old animals, pest and parasite control, cleaning, disinfection, etc.

Each dealer and exhibitor shall assure that the attending veterinarian has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Correct by October 31, 2026 and forward.

2.75(b)(1)

Records: Dealers and exhibitors.

At the time of the inspection there were no records available for inspection. The zoo manager later sent records by email including an Excel spreadsheet of the animals on hand but it did not have all the information required by regulation 2.75(b)(1)(i.-vii.).

Accurate records of animals on hand, including acquisitions and dispositions, (purchases/births and sales/deaths), are necessary to assess the health and wellbeing of the animals on site and allow tracking of animals being used for regulatory purposes.

Inspection Report

Every dealer other than operators of auction sales and brokers to whom animals are consigned, and exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning animals other than dogs and cats, purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born or hatched of any animal while in his or her possession or under his or her control, to the extent that any identification or counting of offspring can be carried out without unduly disturbing nesting or rearing activities.

Correct by October 31, 2026 and forward.

3.27(b) **Repeat**

Facilities, outdoor.

At the time of the inspection, there were nine guinea pigs housed in a large red barn. The barn had 2 fans running and the roll-up doors on the front and back walls were open. This type of housing is considered outdoor housing and requires approval from USDA's Animal Care Deputy Administrator. No variance was found in the account files.

Housing guinea pigs in outdoor enclosures may subject the animals to uncomfortable or dangerous climatic conditions. Approval from the Deputy Administrator is necessary to ensure that local temperatures and weather conditions are reviewed and determined to be appropriate to protect the health and well-being of guinea pigs housed outdoors.

Guinea pigs shall not be housed in outdoor facilities unless such facilities are located in an appropriate climate and prior approval for such outdoor housing is obtained from the Deputy Administrator.

3.152(b) **Repeat**

Facilities, outdoor

One outdoor enclosure, housing ten ducks and one goose, has only one plastic igloo for shelter. The igloo is too small to contain all of the birds at the same time.

Shelter from inclement weather. Outdoor housing facilities must provide adequate shelter, appropriate to the species and physical condition of the birds, for the local climatic conditions to protect the birds from any adverse weather conditions. Shelters must be adequately ventilated in hot weather and have one or more separate areas of shade or other effective protection that is large enough to comfortably contain all the birds at one time and prevent their discomfort from direct sunlight, precipitation, or wind. Shelter must also be constructed to provide sufficient space to comfortably hold all of the birds at the same time without adverse intraspecific aggression or grouping of incompatible birds. For birds that form dominance hierarchies and that are maintained in social groupings, shelter(s) must be constructed so as to provide sufficient space to comfortably hold all the birds at the same time, including birds that are low in the hierarchy.

This inspection and exit interview were conducted with Morgan City personnel.

You may appeal all or part of any inspection report by submitting a written statement contesting the findings—along with
