INC

Type: ROUTINE INSPECTION

Date: 22-APR-2026

3.150(a)

Facilities, general.

The facility failed to maintain some of their bird enclosures in good repair. The two enclosures housing red-tailed hawks are made of wire with wooden frames. Each enclosure had horizontal and vertical boards that showed signs of rot and decay.

Deteriorated structural components may compromise the integrity of the enclosure and pose a risk of escape or injury to the animals within.

Housing facilities for birds must be kept in good repair, protect the birds from injury, and restrict other animals from entering that may negatively affect the welfare of the birds within. To be corrected by May 15, 2026.

This inspection and exit interview were conducted with facility representatives.
