Type: ROUTINE INSPECTION
Date: 10-MAR-2026

2.31(c)(7)

Institutional Animal Care and Use Committee (IACUC).

Upon recordkeeping review, the following deviations from an approved IACUC study protocol were observed: one additional blood draw was performed, a medication was not given 30 minutes prior to the first set of injections, the second set of injections were performed one week later than expected, and one pig did not receive a medication prior to the second set of injections. These deviations affected four pigs. The principal investigator and the study sponsor had discussed these changes, and the changes had been performed based on ongoing study results, but the IACUC had been not involved in these discussions.

This activity constitutes a significant deviation from the approved activities in the protocol. Making significant changes to protocols without IACUC review and approval deprives the IACUC of the opportunity to provide oversight of animal activities and compliance with the Animal Welfare Act. Failing to complete assessments as described in the IACUC protocol could result in unrecognized suffering in the affected animals.

Principal investigators are to follow the IACUC approved protocols, and any proposed changes shall be reviewed and approved by the IACUC prior to implementation. Those carrying out procedures in an IACUC-approved protocol must adhere to what was approved by the IACUC.

Correct by March 18, 2026.

This inspection and exit interview were conducted with facility representatives.
