Certificate: **57-C-0376**

Site: 001
Hand Me Down Zoo

Type: ROUTINE INSPECTION

Date: 05-OCT-2026

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The attending veterinarian's site visits have not been performed at the frequency agreed upon in the written Program of Veterinary Care. The current Program of Veterinary Care states the attending veterinarian will have regularly scheduled visits bi-annually. The attending veterinarian was consulted and stated that bi-annually meant a frequency of once every 6 months. The last veterinary visit to the facility, per the attending veterinarian, was on October 5, 2025.
Not following the prescribed frequency of regularly scheduled veterinary premises visits can lead to an inadequate standard of veterinary care for the animals. The licensee shall ensure the correct frequency of regularly scheduled attending veterinarian visits occurs as prescribed in the written Program of Veterinary Care.
Correct by: 11/01/2026

2.40(b)(2) **Repeat**

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The facility's methods to control and prevent diseases were inadequate. The licensee is not following the vaccine protocol as described in the Program of Veterinary Care approved by the attending veterinarian. Per the Program of Veterinary Care, cats should be given rabies and distemper once every 12 months and goats and sheep should receive rabies once every 12 months as well.
At the time of the inspection, only five cats had received their rabies vaccine out of the eleven housed at the facility per veterinary records. In addition, there is no veterinary record of any ruminants receiving rabies vaccine. Upon interview, the attending veterinarian stated that both rabies and distemper vaccines should be given as documented in the program of vet care. Failing to follow the agreed upon vaccine schedule does not prevent the potential transmission of disease hazards.
Facilities must use appropriate methods to prevent, control, diagnose and treat disease and injuries. The facility needs to follow the instructions provided by the attending veterinarian and as directed in the written program of veterinary care.

3.1(c)(1)

Housing facilities, general.

The unsealed wood in the cat room needs to be addressed. The facility moved the cats into the old lemur holding area. The wood along the walls and door frame still had evidence of lemur scent marking grime and debris. The licensee states that the material coming off was the sealant that covered the wood. When wood is no longer sealed and impervious to

moisture, then these interior surfaces can no longer be readily cleaned and sanitized. Interior surfaces for cats must be able to be cleaned and sanitized to facilitate cleaning of the area and to reduce disease hazards.
The surfaces of cat housing facilities - including houses, dens, and other furniture-type fixtures and objects within the facility - must be constructed in a manner and made of materials that allow them to be readily cleaned and sanitized or removed or replaced when worn or soiled.
Correct by: 10/15/2026

3.125(a)

Facilities, general.

The metal bed frame with a wood platform is in disrepair in the kangaroo enclosure. This provided furniture is available for the kangaroos to rest on off the ground but has a large hole in the wood that has sharp edges that could potentially cause harm to the kangaroos.
This provided furniture must be constructed of such material and of such strength as appropriate for the animals involved and shall be maintained in good repair to protect the animals from injury.
Correct by: 10/12/2026

3.127(c)

Facilities, outdoor.

The outdoor enclosure for one armadillo did not have adequate drainage. One half of the enclosure was a thick layer of mud, and the other half had standing water over the concrete floor approximately 1-2 inches deep. The armadillo was found in the back of its shelter, a plastic doghouse structure, the only dry area within its enclosure. Its water and food bowl were present on the concrete portion of the enclosure which would require the armadillo to walk through both the mud and standing water to reach them.
Enclosures that do not drain effectively and in which the ground is muddy with no dry path to their food, water, or shelter, can cause animals to develop foot or skin issues due to excessive moisture and mud exposure or cause discomfort.
The licensee must provide a suitable method to rapidly eliminate excess water or otherwise prevent the situation where the animals have no dry surfaces on which to walk to reach their food, water, and/or shelter.
Correct by: 10/10/2026

3.131(d)

Sanitation.

Pest control at the facility needs to be addressed. An effective program is not being maintained to reduce rodents in the feed room or flies in the animal encounter room.
The feed room had evidence of one rodent bait box but did not seem to be effective in reducing the entry of rodents into the area. Rodent droppings were present on the lids of almost every food container around the room.
No fly mitigation practices were observed to be in effect in the animal encounter room and there was an abundance of flies around the hedgehogs, including dead flies in their clean water bowl.
For the animals' welfare and to protect the food supplies, a safe and effective program for the control of insects, and mammalian pests shall be established and maintained at the facility.

Inspection Report

This inspection and exit interview were conducted with the licensee.

You may appeal all or part of any inspection report by submitting a written statement contesting the findings—along with any supporting documentation—to the Deputy Administrator. Appeals of routine, focused, or attempted inspections must be received within 21 days of report issuance as shown by the signature line of this report.

Appeals may be sent by email to AnimalCare@usda.gov.

Appeals sent by mail should be addressed to:
Deputy Administrator
APHIS Animal Care (AC)
U.S. Department of Agriculture
2150 Centre Avenue, Building B
Mailstop #3W11
Fort Collins, CO 80526-8117
